The Booking Trick to Save You Money on International Flights

With the state of air travel this summer—constant delays and expensive airfares—any small booking tip to save time or money can make a big difference.

One such trick is booking open jaw flights. An open jaw flight is a different type of round-trip itinerary that includes multiple cities for the destination and city of origin.

Someone designed a bar for people waiting on luggage at Toronto Pearson Airport

Though the idea was a joke at first, the team at CORE actually went as far as designing some 3D mockups of what such a bar could look like in Pearson's baggage hall, deeming it, very fittingly, the CarrouSnail Bar.
